SOLUTIONS THAT WORK FOR YOUR BUSINESS

Catwalk's inventory management solution offers a complete set of inventory management, manufacturing, and purchasing capabilities that improves supply chain management and delivers an end-to-end procure-to-pay process.

Gain an in-depth, real-time view into key supplier, inventory and procurement indicators. Self-service capabilities for partners, vendors and customers improve collaboration throughout the entire supply chain. With Catwalk's solution, you'll be able to better

manage inventory levels and costs—and better meet fulfillment expectations, improving customer service.

Enjoy real-time, detailed visibility into key inventory control and supply chain management measures, including inventory trends, stock on order, and supplier on-time performance. Track costs and eliminate errors by creating a complete business process flow through purchasing, receiving and account payables.
